**Stephen Brown**  
Trainer / Consultant  
FM-adviso, Inc

ProFM, CFM, FMP, SFP, CPE, CPCP, MBCP, REM, CESCO

Over 25 years global experience in FM, EP/DR/BC

Qualified and Sanctioned by ProFMI, DRI, IFMA, AFE

Proudly Sponsored By

# Context

**“Everything we do before a pandemic will seem alarmist.  
Everything we do after will seem inadequate.”**

Michael Leavitt  
Former HHS Secretary under President George W Bush

**“In the end, it will be impossible to know if we over-reacted or did too  
much, but it will be quite apparent if we under-reacted or did too  
little.”**

Darrin Peppard  
West Grand, CO School Superintendent

# Pandemic Planning for FM's

	PHASE	TRIGGER
Dec/Jan	<b>ALERT PHASE</b>	<ul style="list-style-type: none"> <li>• New Strain Identified</li> <li>• Media Coverage of Potential Pandemic Strain</li> <li>• Human-Human Transmission in Disease's Country of Origin</li> <li>• Potential the Disease Will Affect the Organization and/or its Suppliers</li> </ul>
Jan/Feb	<b>PRE-PANDEMIC PHASE</b>	<ul style="list-style-type: none"> <li>• Presence of Strain in Localized Hot Spots</li> <li>• Minimal Spread Beyond Disease's Source (Country of Origin)</li> <li>• Beginning of Government Reactions (Travel Warnings Issued, Some Transportation Network Closures)</li> <li>• Anticipated Impact to the Organization and/or Impact to its Suppliers</li> </ul>
Mar/ ??	<b>PANDEMIC PHASE</b>	<ul style="list-style-type: none"> <li>• Global/Dispersed Proliferation of Pandemic</li> <li>• Pandemic Directly Affects the Organization and its Employees (i.e., significant, prolonged absenteeism, quarantines issued in/near major operating locations, and travel restrictions)</li> <li>• Higher than Seasonal Average of Absenteeism</li> </ul>
TBD	<b>TRANSITION PHASE</b>	<ul style="list-style-type: none"> <li>• Absenteeism Returns to Normal Levels</li> <li>• Post-Pandemic</li> </ul>

5

# Status

Too dynamic to be displayed

Too much unverified information

**OK to monitor other available sources *within limits!***

**Restrict your actionable information to the official sources**

- World Health Organization (WHO)
- National Departments of Health & Human Services
- Centers for Disease Control and Prevention (CDC)
- Regional / Local Health Departments

# Information

Infection is caused by human-to-human transmission via respiratory droplets. A secondary way is by touching your eyes, nose, or mouth

- 1-14 day incubation period after exposure.
- **Unconfirmed** interval of virus survival on general surfaces (est. 3-7 hours),
- Approximately 80% experience mild symptoms (i.e. the common cold), and an estimated 15% experience flu-like symptoms that may require hospitalization. (WHO)
- Variable mortality rates (statistics are still evolving)

# Responsibilities for Facility Managers

No time to delay; it is time for composure and action.

A global pandemic is a diverse and extreme crisis evolving:

health	operations	economic	security
logistics	sustenance	endurance	etcetera

To any and all extent possible, the FM *must* contribute to the response and to the solutions.

# Operations & Maintenance

## HVAC

Increasing fresh air intake for HVAC and increasing MERV ratings of air filters provides narrow benefit. **Correcting deferred maintenance, adhering to scheduled activities and MERV-13 filter ratings are generally recommended.**

## Cleaning and Disinfecting

**First clean to remove soiling with detergent mix, then disinfect with a diluted bleach solution, 70% alcohol solution, or EPA-registered disinfectant.**

**Increase the frequency and thorough activity on commonly touched surfaces. Employ daily steam cleaning for rest room facilities.**

# Operations & Maintenance

## Plan for Temporary Closings

- Program BAS to reflect unoccupied settings
- Implement shut-down protocols
- Define minimum staffing (Security, Maintenance, Cleaning)
- Consider performance of disruptive activities
- Plan for limited one-off entries

# Operations & Maintenance

## Staff Support examples

Educate employees on infection control and personal hygiene and courtesy matters.

Develop a robust observation / surveillance process to identify and manage circumstances where there as been virus transmission or infection.

Ensure adequate supply of supplies and PPE.  
(tissues, disposable gloves, N-95 masks, disinfectants, etc.)

Be flexible with planning and staff management.

# Other O&M Examples

Reduce gathering space use

Reduce / limit visitors

Changed / flexible work hours

Increase telework / work from home

Use of gloves for mail/parcel handling

Increase provision and convenience of hand soap and hand sanitizers

[For more information, see ProFM Module 5](#)

12

# Cleaning Examples

## Extra cleaning with appropriate disinfectants and PPE

Exceptional and robust cleaning when a person suspected or confirmed having the virus has been present.

### Commonly touched surfaces, for example:

Elevator call buttons

Coffee / catering handles

Shared writing implements

Conference furnishings

Door handles / push pads

Office technology controls

Telephones

Chair arms

For more information, see ProFM Module 5

# Risk Management

Review existing Business Continuity Plans for guidance  
Critical Operations                      Potential Disruptions  
Alternative Actions

For more information, see ProFM Module 3, Section 5

Consider compliance and legal implications.

OSHA – ‘workplace free from recognized hazards’

> protection from potentially infectious materials

> protection from chemical hazards (disinfectants, etc.)

Obligation to protect customers, clients, vendors

# Risk Management Examples

- ✓ Restrict visitors from the sites or limit the extent of entry.
- ✓ Increase provision of well-being supplies (tissues, masks, hand sanitizers).
- ✓ Provide factual information for persons to take steps to protect themselves.
- ✓ Implement strong mandate for ill persons to stay at home.

# Risk Management Examples

- ✓ Encourage at-risk employees (those with underlying health issues, over 60 years old) to work from home.
- ✓ Reduce or eliminate travel and in-person meetings
- ✓ Shut down non-essential site services; eliminate group gatherings
- ✓ Actively promote and support telework / work from home.
  - Provide the tools and supplies needed for effective performance.

# Risk Management Tasks

- ✓ Understanding alert levels from external agencies.
- ✓ Assembling a pandemic team.
  - Prioritizing activities and schedules
  - Ensure understanding of roles and responsibilities
- ✓ Reviewing pandemic-related policies and documentation
- ✓ Navigating the Business Continuity declaration process

# Communications - Operations

- Post signs to advise visitors and contractors the limits of engagement
- Post reminder placards to encourage enthusiastic hand washing.
- Constantly reinforce other health-related recommendations
  - (Social Distancing, use of hand sanitizers, keep up personal awareness)
- Use appropriate electronic media to share information

For more information, see ProFM Module 1, Section 3

18

# Communications – Management

- Inform occupants and stakeholders of ‘**official communications channel**’ to advise actions implemented or curtailed.
- Advise vendors/suppliers steps taken and how it will impact them.
- Contribute to or become the corporate clearinghouse for relevant factual and accurate information.
- Strongly control rumors and mis-information.

For more information, see ProFM Module 1, Section 3

# Collaboration

- Liaise with other departments (Execs, Risk, HR, Insurance, Production) with a consistent corporate message and implement the BC Protocols.
  - If not yet in place, participate in development .
- Liaise with other departments to be the resource – to provide required support for alternative working settings.
  - Increase spacing between employees      Home deliveries      Technology / equipment
- Become the source for relevant current, factual and accurate information.

For more information, see ProFM Module 1, Section 6

# Summation

- For most people in the United States, including most types of workers, the risk of infection with COVID-19 is currently low. (OSHA)
- Prudent measures and planning involving O&M and Risk Management can improve conditions and reduce disruptions.
- Effective Communications can reduce uncertainty, reduce myths / rumors, and build respect for the FM unit.

# Summation

- Existing BCP can provide a good basis for understanding the enterprise risks and enable responses that protect the employees and the business.
- Cooperation and Supportive actions will reduce tension and anxiety.

❖ BE AWARE

❖ BE RESPONSIVE

❖ BE BOLD

❖ BE THE FM LEADER!
